Online interview with Dell's Security Director

01 Jun 07

By **Steven Vickers**

Ingrian Networks Inc. have released an interview with Jeff Chumbley, the Director of Information, Security and Compliance at computer giant Dell.

Ingrian provide data privacy solutions to global clients including Microsoft, IBM and Verisign, and the online video concerns their latest venture with Dell.

Dell have recently implemented Ingrian solutions to achieve PCI compliance, and according to the specially-designed microsite, "Dell chose Ingrian to strengthen customer trust, Dell's brand, and global privacy objectives."

In the video, which can be accessed online at www.ingrian.techweb.com, Chumbley discusses Dell's six-month effort to provide encryption across 10 applications and to secure the millions of credit card numbers it processes on its website.

"In the video, which can be accessed online at www.ingrian.techweb.com, Chumbley discusses Dell's six-month effort to provide encryption across 10 applications and to secure the millions of credit card numbers it processes on its website."

Erich Baumgartner, the Vice President of Sales and Marketing at Ingrian Networks said: "Dell uses Ingrian to safeguard one of its most valuable pieces of data - the millions of customer credit card numbers it processes."

He continued, "Their experience clearly demonstrates that encryption technology has matured to a point that it can be deployed across the enterprise in record time to provide air-tight security and help companies achieve compliance."
