A Strategic Approach to Enterprise Key Management

Best Practices for Encryption Implementations from Ingrian Networks

Ingrian® Networks announced today details of key management initiatives designed to provide guidance and best practices for encryption implementations. The best practices, culled from work on more than 100 Fortune 1000 deployments, are detailed in the white paper "A Strategic Approach to Enterprise Key Management" which offers guidance into enterprise wide key management, outlining the critical system components required, and the essential criteria with which to evaluate an effective solution. The paper can be downloaded at
